- Fast route to private-label
- Small MOQ possible
- Multiple colours available
- Export packing on request

Frequently Asked Questions

Q. What is a BOPP mini jumbo roll?

A BOPP mini jumbo roll is a compact-format master roll — standard 288 mm width × 1000 m length — coated on a BOPP tape coating line, ready to be slit down into finished consumer tape SKUs. Wellpack Polyplast is a leading BOPP mini jumbo rolls manufacturer in India.

Q. Do you offer printed BOPP mini jumbo rolls?

Yes — we manufacture printed BOPP mini jumbo rolls with your brand logo, name or safety messaging. Up to 6-colour rotogravure printing is available on the same coating line, delivering superior ink density and colour depth.

Q. What is the difference between mini jumbo rolls and jumbo rolls?

BOPP mini jumbo rolls are 288 mm × 1000 m — lighter, compact, easier to handle. Full BOPP jumbo rolls are 1315 mm × 3000–4500 m — for heavy-duty industrial slitters. Adhesive quality is identical on both.

Q. Can you export BOPP mini jumbo rolls to the UK / USA / EU?

Yes — we export BOPP mini jumbo rolls (288 mm × 1000 m) to 18+ countries including the UK, USA, EU, UAE, Australia and multiple African markets. Standard export MOQ is 1 × 20' FCL; smaller trial orders may be arranged.
