UV-Stable Options**For outdoor storage & yards**

UV-stabilised stretch wraps for outdoor pallet storage, construction sites and open yards — resists degradation from sun exposure for extended outdoor life.

- UV-stabilised formulation
- Outdoor storage ready
- Extended weathering life
- Yellow / black / white shades

Same Performance, Extra Visibility**No compromise on load stability**

Cast-line manufactured on the same 2026 line as our clear film — you get 300%+ stretch, high puncture resistance and consistent cling, plus the colour benefit.

- 300%+ stretch ratio
- Two-side cling retained
- High puncture resistance
- Multi-layer cast construction

Frequently Asked Questions

Q. Are you a coloured / printed stretch film manufacturer in India?

Yes — Wellpack Polyplast is a printed and coloured stretch film manufacturer in India. We produce black, white, red, blue, green and custom-tinted LLDPE stretch films on our fully automatic 2026 cast line at Patan, Gujarat.

Q. What is black stretch film used for?

Black stretch film is an opaque LLDPE film used for pallet-level load concealment — hiding the contents of valuable, sensitive or confidential shipments during transit and storage. It's widely used in high-value export logistics.

Q. Do you offer UV-stable coloured stretch films?

Yes — we offer UV-stabilised coloured stretch films (typically in white, black or yellow shades) for outdoor pallet storage, construction sites and open-yard warehousing where the film is exposed to sunlight for extended periods.

Q. Can you match my brand colour on stretch film?

Yes — for volume orders we can Pantone-match your brand colour on our cast line. Please contact our sales team with your colour reference and expected annual volume for a custom-colour quote.

Request a quote: <https://bopptapemanufacturers.com/products/printed-stretch-film> — share your specs and our export sales team will respond within 24 hours.
